

Bay Engineering, established in 2001, is a well organised, modern, clean and friendly subcontract CNC machine shop, supplying high quality ISO9001:2015 CNC machined components to commercial companies who require high quality parts.

CNC Miller

We have a vacancy for a fully skilled CNC miller to join our team. The successful candidate will program, set and run our Haas mills. We have 3, 4 and 5 axis machines, training will be given to any candidate who is fully skilled in other systems. All programming is done on our CAD system, One-CNC XR8. Full training will be given to a candidate who is not familiar with One-CNC, but has used other similar systems in the past.

Standard hours are 8am to 5pm Monday to Thursday and 8am to 1pm Friday. Overtime is nearly always available. 5 weeks holiday plus bank holidays. Rate of pay is dependent on experience and overtime worked.

Job Type: Full-time
